

WE ARE THE ARTISTS WHO CRAFT THE EMBLEMS

Since 1958 Elliot Barry has been producing high quality emblematic jewelry made right here **in the United States**. Our skilled craftsmen work with a wide variety of metals — from brass and copper to precious metals including sterling silver, gold filled and solid gold metals of 10K and 14K quality.

The domestically produced product we offer includes **custom** lapel pins, charms, tie tacs and cuff links designed to offer awards of the **highest intrinsic value** that will enhance your brand.

In addition to our USA-produced product line, we offer a wide array of lapel pin options and unique products produced by our **international manufacturing team**. Imported items offer economically priced options and optional manufacturing processes.

But we don't stop at lapel pins. We also offer other **custom metal products**, some of which are featured on Page 2.

Thank you for putting your trust in Elliot-Barry.

THE EVOLUTION OF THE EMBLEM

BLANKING

We start with a blank piece of base metal or precious metal (gold or silver).

STAMPING

Using a steel die, we stamp the emblem image into the metal blank.

TRIMMING

Using custom tooling, we then cut the emblem out to its actual shape.

STONE SETTING

We set one or more gemstones into the still unfinished emblem.

FUSION

We weld a metal post to the back of the emblem to hold the backing.

FINISHING

We polish and/or plate the emblem.

ENAMELING

We add black colorfill to the background of the emblem, and it is now finished and ready to ship.
